

Instructions for “Eyra” the language recording app

Overview of ‘Eyra’

The ‘Eyra’ app is a smartphone application for recording selected sentences (tokens) in a specific language. Each sentence consists of one or more words. Each sentence is recorded separately. The user reads a sentence from the display of the smartphone and controls the recording by tapping the smartphone display. The user can see how many sentences he has read and receives regular progress reports. User can stop or resume recording without losing track of how many sentences have been recorded.

- Downloading and installing the smartphone app
 - Scan QR Codes on your Android phone do the following:
 - Install a barcode scanner app such as **"iNigma barcode scanner"**
 - Launch The bar scanning app and tap the Video Camera icon.
 - Aim The camera at the QR code below. After a couple of seconds, you see the data at the bottom of the screen.
